Hongzhi CHEN

RM 122(A), SHB, CUHK, Hong Kong (+852) 6840-6304 | (+86) 150-027-34771 $\$ chzyaobaiwei@gmail.com $\$ https://yaobaiwei.github.io/

ACADEMIC EXPERIENCE

2016.8 - The Chinese University of Hong Kong (CUHK)

Shatin, Hong Kong

Present $\ \mathbf{Ph.D.}$ in Computer Science and Engineering

• Supervisor: Prof. James Cheng

2011.9 - 2015.6 Huazhong University of Science and Technology (HUST)

Wuhan, China

B.Eng in Computer Science and Technology

Overall GPA: 3.88 / 4.00 Rank: 1/30/472 (in a **30-student Honor Class**)

RESEARCH INTERESTS

My general research interests cover the broad area of distributed systems and databases, with special emphasis on distributed graph processing systems and distributed machine learning/deep learning systems. My current works focus on RDMA based OLAP/OLTP system over knowledge graphs, distributed DL training system and Graph Neural Network.

WORK EXPERIENCE

2019.2 - HUAWEI, 2012 Lab, Parallel and Distributed Computing Laboratory

Shenzhen, China

Present • Research Intern in MindSpore Team, Distributed Deep Learning Platform.

2017.5 - 2017.8 University of Pennsylvania, NetDB Lab, Dept. CIS

PA, USA

• Visiting Scholar, Distributed Graph Query Optimization Supervisor: Prof. Boon Thau Loo.

2014.6 - 2015.6 Microsoft Research Asia, Software Analytics Group

Beijing, China

Research Intern, Large-scale Data Analytics, Distributed System.
 Supervisor: Qingwei Lin (Lead Researcher) and Dr. Jianguang Lou (Principle Researcher).

2013.9 - 2014.6 HUST, IDC Lab, Dept. CSE

Wuhan, China

• Research Intern, System Optimization on Hadoop. Supervisor: Prof. Ruixuan Li

PROJECTS

My research focuses on the design and implementation of distributed systems and the applications on the top of it. I have led or participated as the core developer of the following projects.

- Grasper [Ongoing] An RDMA-enabled graph OLAP/OLTP system with good scalability, which currently has achieved order of magnitudes performance improvements over existing systems (e.g., Titan, JanusGraph, OrientDB, Neo4j).
 - PGE A representation learning framework for property graph embedding. The key idea of PGE is a three-step framework to leverage both the topology and property information into Graph Neural Networks for a better node embedding result.
- GraphRex An efficient framework for graph processing on datacenter infrastructure. The key technical contribution of GraphRex is the identification and optimization of a set of global operators whose efficient implementation is crucial to the good performance of large, datacenter-based graph analysis.
 - G-Miner A distributed graph processing system aimed at general graph mining problems, which have intensive local computation inside a subgraph. We modeled each subgraph processing as a task and designed a task-based pipeline to improve the parallelism between computation and communication. A dynamic task stealing mechanism as well as an efficient cache strategy were also proposed to further speed up the task processing.
- G-thinker Real applications, such as graph matching and community detection, often require computation intensive graph analytics, which cannot be represented by vertex-centric algorithms for efficient execution in systems like Pregel and GraphLab. We proposed G-thinker, a new subgraph-centric general graph processing distributed system, which is natural for subgraph finding problem.
- PPA- A scalable toolkit for de novo genome assembly was developed based on Pregel. PPA-Assembly Assembly provides a set of key operations in genome assembly, which were implemented by practical Pregel algorithms (PPAs) with strong performance guarantees.
 - FPM A novel and general distributed framework to mine frequent patterns, including frequent itemsets/sequences/graphs.

I also joined in some other research projects during my work at CUHK, UPenn and MSRA.

- RANGE-LSH Using maximum inner product for similarity search, which significantly outperforms SIMPLE-LSH, and RANGE-LSH is robust to the shape of 2-norm distribution and different partitioning methods.
 - GraphD It offers out-of-core support for processing very big graphs in a small cluster of commodity PCs, with performance comparable with the state-of-the-art distributed in-memory graph systems.
 - LWCP A fault tolerance mechanism for Pregel-like systems with performance tens of times faster than the conventional checkpointing mechanisms.
 - More If you are also interested in my previous works at MSRA, Software Analytics Group, please visit my homepage for more details. My works at MSRA focused more on distributed data analytics, including OLAP, pattern mining, text clustering and anomaly detection. I mainly participated in 4 projects as a core developer, i.e. Service-Intelligence, Service-Insider, iDice and In4. In particular, both Service-Intelligence and iDice have been published in ICSE' 2016

AWARDS & HONORS

- 2019.5 SIGMOD Travel Award
- 2018.4 EuroSys Travel Award
- 2016 2020 CUHK Postgraduate Studentship.
 - 2015.6 The original winner of Hong Kong PhD Fellowship.

- 2015.6 "Stars of Tomorrow" at Microsoft Research Asia (Only 15% research interns won the Award)
- 2015.6 Outstanding Graduates (3% in HUST)
- 2014.10 CCF (China Computer Federation) National Top 100 Outstanding Undergraduates (Top 0.1%)
 - 2014.9 Academic Excellence Scholarship (2% in HUST)
- 2014.9 Merit Undergraduate (2% in HUST)
- 2013.9 National Undergraduate Scholarship (2% in HUST)
- 2013.9 Merit Undergraduate (2% in HUST)
- 2012.9 Most Outstanding Undergraduate (1% in HUST)
- 2012.9 Academic Excellence Scholarship (2% in HUST)

TEACHING

- Spring, 2018 CSCI1020: Hands-on Introduction to C++
 - Fall, 2017 ENGG1110: Problem Solving By Programming
- Spring, 2017 ENGG1110: Problem Solving By Programming
 - Fall, 2016 ENGG1110: Problem Solving By Programming

PROFESSIONAL ACTIVITIES

External Reviewer

- 2019 SIGMOD
- 2018 VLDB, ICDE
- 2017 VLDB, ICDE, CCGRID, BigData
- 2016 VLDB, KDD, SOCC, ICDM, DASFAA, BigData, APWeb

Participation in

- 2018 European Conference on Computer Systems, Porto, Portugal
- 2015 China National Computer Congress, Zhengzhou, China

SKILLS

Programming C, C++, C#, Java, Python

Operating Linux, Windows

Documentation Latex, MS Office, HTML
